BELLISSE®

COMFORTABLE SUPPORT AFTER BREAST CANCER SURGERY
**Bellisse®**

**INNOVATIVE APPROACH TO BREAST AND CHEST WALL EDEMA FOLLOWING BREAST CANCER SURGERY**

Bellisse® with its special Compression Comfort® inner support system is the innovative solution for the management of breast and chest wall edema. Bellisse® is designed to meet the specific needs of women suffering from lymphedema, post-surgical discomfort, post-radiation edema and/or fibrosis. It is available in a large range of sizes and in two colors, buff and black. This medical compression garment can be worn day and night, is fully adjustable, and provides gentle compression with and without the addition of breast pads. It helps to reduce discomfort and provides gentle, even compression around the torso, facilitating lymph drainage from the breast and chest wall.

Bellisse® was developed by Lesli R. Bell, DPT, CLT-LANA, a specialized lymphedema therapist. Her interest in women’s health and oncology led her to pursue an idea for a compression garment for the management of lymphedema of the chest wall. Bellisse**® is the first compression product made especially for the needs of the post breast cancer surgery patient.

**BELLISSE®**

**COMFORT MAKES A DIFFERENCE IN A WOMAN’S EVERYDAY LIFE**

**Step 1:** Determine your client’s Band Size:
- Measure circumferentially below the bust where a regular bra rides.
- Drop the tape 2”–3” and measure around the bottom of the rib cage.
- Use the larger of the two rib cage measurements for your client’s band size. Round odd numbers up.

**Step 2:** Determine your client’s Cup Size:
- Measure circumferentially around the fullest part of the bust.
- Subtract largest rib cage measurement from the bust measurement to determine cup size.

**Step 3:** Secure front zipper with hooks and eyes to hold garment in place during zipping.
- For easy donning and doffing

**Step 4:** Soft, non-rolling lower band keeps garment from riding or rolling up.
- Soft on the skin
- Smooth while sleeping
- Unobtrusive under clothing

**Step 5:** Highly adjustable with three position back closure and with extender providing additional 3 rows of eye loops.
- Maximum adjustability

**Step 6:** Padded straps are adjustable.
- Comfortable wearing without shoulder pressure

Available in different shapes, the **JOBST® JoViPads** address particular areas of the breast and chest wall affected by pitting edema and/or fibrosis. The pads provide gentle and prolonged pressure to soften congested tissue and encourage evacuation of lymph fluid to functional pathways. Designed for use under the **Bellisse® Compressure Comfort®** Garment.
