

# JOBST® JoViPak® Head and Neck Garments

JOBST® JoViPak® Head and Neck Garments are for lymphedema patients who want a more **comfortable** and **easier** alternative to bandaging. These handmade compression garments can handle even the most difficult edema because of their continuous flow channeling and blended density chip foam construction.

## STANDARD CHIN STRAP

Designed to address edema of the neck, mandible, and the anterior/lateral aspects of the face (partially covers the ears). The open neck seam accommodates your choice of padding. The VELCRO® Brand closures at the neck and top of head (or optional Occipital Head Strap) can be adjusted to patient's comfort level, making the garment suitable for overnight wear. Should be ordered with the Universal Neck Pad.

## UNIVERSAL NECK PAD

Designed to address bilateral head and neck edema with swelling of the neck in front of or behind the ear. If swelling is present in front of the ear, order this pad with a Standard Chin Strap. If swelling is present behind the ear, order this pad with an Extended Chin Strap.

## EXTENDED CHIN STRAP

Designed to address edema of the neck, mandible, and the lateral aspects of the face; covers the ear, the lateral aspect of the head and behind the ear. The open neck seam accommodates your choice of padding. The VELCRO® Brand closures at the neck and top of head (or optional Occipital Head Strap) can be adjusted to patient's comfort level, making the garment suitable for over-night wear. Should be ordered with the Peri-Auricular Neck Pad.

## PERI-AURICULAR NECK PAD

Designed to address bilateral head and neck edema with swelling of the neck in front of or behind the ear. Order this pad with an Extended Chin Strap.

## FULL FACE MASK

Designed to cover the entire face except the nose and lips. This mask has adjustable VELCRO® Brand closures on the top and back of the head (the Occipital Head Strap), the neck, and above the top lip. The adjustable strap across the upper half of the face allows for full vision when needed.

## HALF FACE MASK

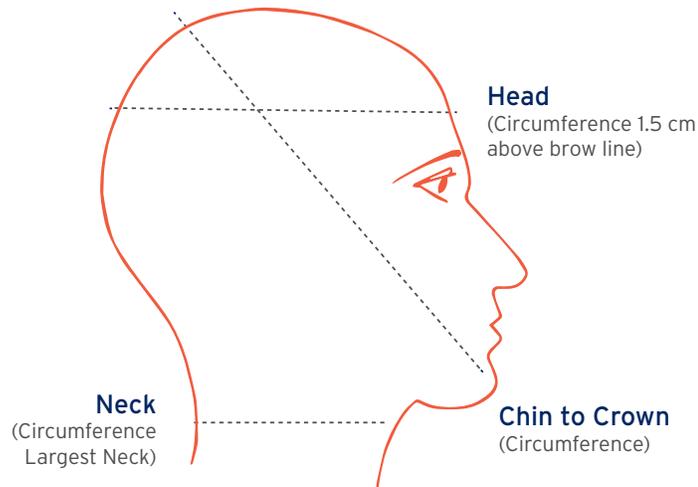

A modified version of the Chin Strap, this loosely foam-filled garment covers the cheek, eye, and forehead. The VELCRO® Brand closures at the neck, top, and back of head (Occipital Head Strap) can be adjusted to patient's comfort level, making the garment suitable for overnight wear.

## EYE PAD

Designed to provide bilateral padding over the upper half on the orbital area face. If used under the JOBST® JoViPak® Full Face Mask for therapeutic benefit, it may be ordered without adjustable head strap.

# Measuring for Head and Neck

CIRCUMFERENCE IN CENTIMETERS			
Size	Head	Neck	Chin to Crown
<b>Small</b>	53.3 - 55.9	28 - 33	30 - 63.5
